

MILLIONS IN SAVINGS MIGHT BE CLOSER THAN YOU THINK.

Tax incentives on equipment can save your company millions on the total cost of data center ownership. In 2019 Illinois took the country by surprise, passing SB1591 to provide datacenters in the state with sales tax abatements. Do you qualify? Use this checklist to start the process.

- You plan to make a capital investment of at least \$250 million over a 60-month period
- You are prepared to enter into a project labor agreement for the applicable construction or rehab
- Your project will create at least 20 new jobs at 120% of county median wage over 60 months
- You are looking for a dependable data center partner that can help you reduce your costs while scaling your business in the timeframe you need
- Your company is carbon neutral or plans to attain certification under one or more green building standards

Learn more about the new sales tax incentives making Chicago one of the lowest-cost data center regions in the U.S.
