

STACK INFRASTRUCTURE to Expand Data Center Presence in Chicago

*Adjacent Development to More Than Double
Capacity in a Key STACK Market*

DENVER, CO – JUNE 20, 2019 – STACK INFRASTRUCTURE (“STACK” or the “Company”), the data center company built from the ground up to address the technology infrastructure needs of rapidly scaling enterprises and hyperscale businesses, today announced plans for a significant expansion of its Chicago data center campus. The future development will be adjacent to STACK’s existing facility, which currently offers 13MW of critical power and 221,000 square feet of space. The new multi-story data center will offer at least 20MW of additional critical capacity with the possibility of additional growth, bringing STACK’s total capacity at its Chicago data center campus to at least 33MW.

“Chicago is one of a number of important and growing markets for our clients, and as a result, it is a key market for STACK. We’re committed to investing here so that we can continue to support our clients and stay ahead of their needs,” said Brian Cox, Chief Executive Officer of STACK. “In keeping with our core commitment to being a trusted partner, this project delivers on our promise to strategically evolve and align our offering with our clients’ growth trajectories.”

STACK is committed to being the data center industry leader in building and delivering flexible critical infrastructure solutions that meet and support the complex requirements of enterprise and hyperscale deployments. The Company’s offering includes hyperscale campuses and build-to-suit data centers (“HYPER STACK™”), immediately available wholesale colocation and private data suites (“READY STACK™”), and powered shell options (“POWER STACK™”).
