STACK INFRASTRUCTURE Appoints Val Milshtein as Chief Technology Officer

Val Milshtein to create a technology center of excellence for the Company

Denver, Colorado (January 12th, 2021) STACK INFRASTRUCTURE ("STACK" or the "Company"), the digital infrastructure partner to the world's most innovative companies, today announces the appointment of Val Milshtein to the newly-created role of Chief Technology Officer. Milshtein will be responsible for advancing platform technologies, client services, and next-generation sustainable technical solutions for its hyperscale cloud and enterprise clients.

Mr. Milshtein comes to STACK with over 25 years of experience in product development, process design, software engineering, and systems integration in the telecom and data center industries. He most recently served as the Chief Information Officer and Senior Vice President of Network Services for Cologix, an interconnection and data center company. Previous to that, he held a leading product development role at Level 3 Communications (now Lumen).

"STACK continues to look out for the disruptive technologies that will shape digital infrastructure for the next decade and beyond," said Brian Cox, STACK INFRASTRUCTURE's Chief Executive Officer. "Val has a proven and successful history of keeping his eyes on the technical horizon and moving leading platforms forward in innovative ways. I am proud he is part of STACK."

"I could not be more excited to join the STACK team," said Mr. Milshtein. "STACK is assuming a leadership position in the rapid growth of technical infrastructure. We are delivering accelerated scale through forward investment and cutting-edge development tactics. An enhanced technology strategy will deepen the level of service we can provide to our clients and help our Company exceed expectations for performance, availability, and transparency."
